

SHAPING THE FUTURE OF ILLIAD ADDONS

BETTER, FASTER, STRONGER

SHARKNADDON

THE SECOND ONE

FIREFOX. CHROME. SAFARI. IE.

BROWSER PREFERENCE

ad 8.5 added the ability to use custom flags. Flags can be used in both Client and Server addons.

DOCUMENTATION

LLiad Client Addons

Adding a Transaction Flag

Adds a flag to a request. A CustomFlag with the specified flag name must already exist when used in the addon. If a corresponding flag is not found, it will not be added to the request. Flags that are defined internally by the system cannot be added. Available in the following addon types:

- System
- Addon
 - FormUser
 - FormMain
 - FormRequest

Parameters

- **TransactionNumber:** The transaction number to add the flag to (optional when this command is used in a FormRequest addon).
- **FlagName:** The name of the flag to be added to the request

Example

The following is an example of the syntax used in a SystemManager addon that will add a transaction flag to the ILLiad request with TransactionNumber 1234. The flag that will be added to the request is "Expedite Request."

```
executeCommand("AddTransactionFlag", { 1234, "Expedite Request" });
```

FormRequest addon:

```
executeCommand("AddTransactionFlag", "Expedite Request");
```

BETTER. GRADUAL. SLOW!

0	1	2	3

PANELS

THE BAD NEWS.

A photograph of a man on a stage, wearing a white short-sleeved shirt and khaki pants, making a rock hand gesture with his right hand while speaking into a microphone. He is smiling and looking down. To his left, a woman with blonde hair, wearing a black and white striped shirt, is laughing and looking towards him. The background is dark with blue stage lighting. A semi-transparent dark banner is overlaid at the bottom of the image, containing the text 'PANELS' and 'THE GOOD NEWS'.

PANELS

THE GOOD NEWS

AS FOR THE FUTURE, YOUR TASK IS NOT TO FORESEE IT, BUT TO ENABLE IT.
